

LISTING OF THE CLAIMS

Please rewrite the claims as follows:

1. (Currently Amended) An electrophoretic display, comprising:
- a substrate,
- a first electrode, a second electrode having a predetermined size and shape and arranged regularly, an insulation layer disposed between said first electrode and said second electrode are supported by said substrate, and microcapsules, each containing a dispersion liquid comprising a dispersion medium and two species of electrophoretic particles different in charge polarity and color, are disposed on said second electrode,
- wherein said first and second electrodes are disposed so as to create an electric field along a surface of said substrate and are to be supplied with a voltage so as to move said two species of electrophoretic particles in mutually opposite directions along said electric field to effect display by viewing said two species of electrophoretic particles gathered on the second electrode from above the substrate.

Claims 2 and 3 (Canceled)

4. (Currently Amended) A display according to ~~Claim 2~~ Claim 1, wherein the colors of said two species of electrophoretic particles are white and black and said display effects white and black display.
5. (Original) A display according to Claim 1, wherein a color filter is disposed on said microcapsules to effect color display.
